

Module co-development

We can also provide your company with high function module to desire to be clean consistently for desiring for important parts to optimize surface of high precision and function.

Especially in the field of semiconductor.

We can also provide with product greater value-added content by to do module co-development to base on your potential needs.

- ▶ Designing technology
- ▶ Process technology
- ▶ Assembling technology
- ▶ Evaluation technology

CVD material supply system

Biochemical analytic dispensing nozzle

CVD material clean bottle

Gas supply integration module

Gas supply panel
